**Can't a property that is identified through a one
also be identified through any other one?**

Can't a property that is identified through a thing also be identified through any other thing?

Research is the search to find whether the property identified through a one is common to all or not!

Is no property common?

One who has no capacity to make students identify the properties which are discoverable through everyone and everything is not a teacher!

One who has no capacity to identify the properties which are discoverable through everyone and everything cannot be an analyst!

Your knowledge on anything is incomplete if you could not identify the properties which are discoverable through everyone and everything

Nothing can be analyzed without finding its properties

Should one know everything in order to be an intellect?
